

FREE COMMUNITY WORKSHOP

The Struggling Child in the Classroom

ATTENTION: Parents, Teachers, Caregivers

Do you or someone you know have children that struggle in school? There are a variety of reasons there may be difficulties in the classroom.

Could it be.....

- **Vision** - the muscles of the eyes don't work correctly?
- **Hand Skills** - is there difficulty manipulating items with their hands?
- **Posture** - are they unable to sit in a chair?

These are only a few explanations as to why a child may have issues in the classroom and with homework.

Come hear more about this popular topic and learn how to help your child be successful at home and at school.

Presented by:
Magda Girao, MOTRL-CST-D

Monday, October 26th, 2015
7:30 - 9:00 pm
