We want to continue to offer the programs that interest you the most.

**Fall 2016**

Please put a check by the following Free Workshop topics that you want to learn about.

- The Struggling Child** - How to identify if and where your child may have difficulties.
- Sensory Integration** - Ways to introduce sensory input and reasons for certain behaviors basics.
- Oral Motor** - The use and functions of the jaw, lips and tongue.
- Picky Eating** - Reasons behind fussy eaters and suggestions & strategies to improve mealtime struggles.
- Sensory Diet** - Learn about sensory input and its effects on handling challenging situations.
- Sensory vs. Behavior** - How to distinguish when a child is being influenced by sensory issues or just simply being a child.
- Developmental Delays** - Recognize signs to help attain milestones before physical & school performance are affected.
- Speech & Language Development** - Learn about tools for growth, stages, warning signs, disorders and intervention techniques.
- Speech Delays** - Discover what you can do when you suspect delays or difficulties.
- Listen Up \* Therapeutic Listening** - Structured program to improve listening skills.
- Handwriting Without Tears** - Learn appropriate developmental multi sensory tools and strategies to aid in all styles of learning.
- Interactive Metronome for Parents** - Research based computer programmed training for clinical benefits and functional gains for movement that will help with every day life.
- Flat Feet / Toe Walkers** - Learn how toe walking & flat feet can affect a child's gross motor development.
- Strength in Coordination** - A look at what clumsiness in your child could actually mean.
- Other:** \_\_\_\_\_

Please put a check by the following 6-10 week Group Programs that you would register your child for.

- Social Skills Group** - This group is designed to encourage social, reciprocal and communicative skills in a playful atmosphere. Emphasis will be placed on sharing, turn taking, parallel and cooperative play.
- Sensory Integration** - This group is designed to enhance strength, endurance, sensory processing and respiratory control. It also impacts fine motor skills, self-regulation, and social skills and improves coordination.
- Motor Coordination** - This group works on the timing in the brain and helps enable the whole mind, body system to experience symmetrical flow and will help improve challenges.
- Handwriting without Tears** - The program follows research that demonstrates children learn more effectively by actively doing, with materials that address all styles of learning.
- Oral Motor** - This group is designed for children who have difficulty eating, drinking, drooling, speech delay or any other problems with oral motor control.
- Picky Eating** - Picky Eating is an extremely popular subject in our clinic these days, so we formed a group that can help those who are affected by this problem.
- Bike Riding** - Learn techniques to get your child up & riding and ready for some FUN!!!!

***WE CREATE CLASSES BASED ON THE INTEREST - SIGN UP TODAY AND WE WILL CALL YOU WHEN GROUP GETS SCHEDULED WITH AT LEAST 4 CHILDREN***

Thank you for taking our Kids In Motion survey please use the back of sheet if you have any comments. We will tally the results and put the programs in place that you are looking for!
